## **Fact sheet**

## **Support at home – Nursing Services**

Capecare enables our clients to live independently by attending to their ongoing health care needs in their home.

Access to nursing care at home has many benefits:

- Clients do not need to leave home to visit a
  practice nurse. If they are in pain or have limited
  mobility we can provide nursing services within the
  privacy of home.
- A set day, date and time can be arranged for nursing service so there's no need to miss out on social outings or family visits.

Capecare has a team of qualified and experienced Nurses to assist with at-home clinical care. Our nurses are all registered and follow best practice evidence-based nursing care and guidelines.

Funding for Capecare's in-home nursing services can come from a range of different funding types, including Commonwealth Home Support Package funding for short term nursing care and Support at Home Program funding for long term ongoing care and support.

#### **Some examples of Nursing Services are:**

- Wound assessment and care
- Continence assessments and ongoing continence management
- Urinary catheter changing, education and support
- Administration of medications not provided by support workers, ie injections, pessaries, and enemas
- Organisation of medications and pharmacy liaison
- Diabetes management and support
- Blood pressure monitoring
- Stoma assessment and support
- Gastrostomy assessment and support
- Chronic disease management
- Assessment and supply of specialised dressings, medical equipment, and clinical supplies
- Liaison and communication with your GP about your health and wellbeing
- Support and assessment for Dementia care
- Support and assessment for mental health care

### **After hours nursing support**

For clinical or nursing support after hours, clients will need to attend the nearest hospital's emergency department for assessment and treatment, or they may advise a client or their carer to call 000 and request ambulance assistance.

On returning home Capecare can continue to support client needs.
